

CellNass SmartStor Cabinets & Boxes

[Product Prefix WS]

Slide and Block Storage Cabinets

Both the CellNass SmartStor 2 and 8 cabinets are manufactured from corrosion-protected steel, and have been specifically designed to maximise the number of slides and/or blocks they hold. There is an optional static or wheeled (lockable) heavy-duty base plinth. A lid then completes the set. It is recommended that no more than five cabinets be stacked on top of each other at one time.

SmartStor 2

SmartStor 8

SmartStor 2 & 8 stacked onto a static plinth with lid

CellNass SmartStor 2

Routine Slide and Supa Mega Storage Cabinet

The CellNass SmartStor 2 slide & block storage cabinet incorporates two drawers, each able to accommodate:

- Routine Slide Box
- Supa Mega Slide Box
- Supa Mega Block Box
- A combination of any three slide boxes for routine or Supa Mega slides.

At the front of each SmartStor cabinet drawer is a purpose-built slot which holds an archive label. This label can be transferred onto each SmartStor box when full, preventing the possibility of human error from duplication of labelling. Each SmartStor cabinet drawer also incorporates holes on their underside, allowing users to easily push up and access the SmartStor boxes. The SmartStor boxes are removable to aid both onsite and offsite archiving.

CellNass SmartStor 8

Routine Block Storage Cabinet

The CellNass SmartStor 8 block storage cabinet incorporates eight drawers, each able to accommodate:

- Routine Block Box

KEY BENEFITS

- 1 Negate future cataloging costs when in a long term CellNass contract
- 2 Free of charge loan units when in a long term CellNass contract
- 3 Stackable
- 4 Maximise onsite slide and block storage
